

# Hitoshii

Monthly

6x		3+	24x
4÷			
12+	6x		

## HOW TO SOLVE:

In this 4x4 puzzle, all the numbers from 1 to 4 must appear in each row and column, as in a su-doku. The totals given in each of the blocks bounded by the coloured lines are calculated from the sum of the numbers in all of the squares within that block. That sum can be arrived at by multiplication, division, addition and subtraction as indicated to the right of the total.

## TO ENTER:

When you've solved the puzzle, the number in the circle will be your prize answer. Go to [www.puzzlemagazines.co.uk/hitoshii-monthly](http://www.puzzlemagazines.co.uk/hitoshii-monthly) and click on the link there to the £100 competition. Follow the instructions on the page and enter your answer in the box provided. If you've never visited the site before, you'll have to register as a new user at [www.puzzlemagazines.co.uk](http://www.puzzlemagazines.co.uk) before you can submit your entry. See website for full terms and conditions.

Closing date: 16/07/09.
